RESCHEDULED FOR 20th MARCH 2021
SKIN AGEING AND SKIN DISEASES
A predetermined fate?

From the dream of a person-centered medicine in harmony with nature, a modern and visionary idea of effective drugs with no side effects, and from evidence gained from research, Low Dose Medicine was born.

The use of SKA low doses of medicinal plants and biological molecules (neuropeptides, cytokines, hormones and growth factors) is at the centre of Low Dose Pharmacology.

Low-dose medicines represent the winning approach for dermatologic diseases such as Psoriasis, Atopic Dermatitis and Vitiligo, as well as skin ageing related cell senescence, inflammation and age-related skin degeneration phenomena and are considered the new frontier of non-surgical rejuvenation.

Program

Part I
LOW DOSE MEDICINE: THE WINNING SOLUTION FOR NON-SURGICAL REJUVENATION

The oral low dose cytokines and growth factors paradigm in the prevention and treatment of skin ageing and inflammation

Alessandro Perra
Scientific Director Guna S.p.a.

Part II
LOW DOSE CYTOKINE THERAPY IN DERMO-AESTHETICS AND TRICOLOGY
Effective, safe, high compliance therapy. The future is here.

Practical prescription of oral low dose cytokines and growth factors in Vitiligo and Psoriasis (practical course).

Torello Lotti
Professor & Chair of Dermatology University of Rome " G.Marconi" Rome , Italy
